

10th April 2006

ENVIRONMENTAL POLICY

Dana Automotive Systems Group Australia – Yennora as a leading automotive components manufacturing facility is committed to follow the principle of conservation of resources. This is achieved through waste minimisation, recycling, the efficient use of energy and the disposal of manufacturing by products in an environmentally acceptable manner.

Dana Automotive Systems Group Australia – Yennora is committed to protecting the environment through the prevention of pollution and by doing so; will seek to exceed the requirements of all applicable environmental regulations to which the facility subscribes.

Prevention of pollution is achieved:

1. by giving consideration to the environmental impact of the design, manufacture, packaging and supply of products.
2. by examining and assessing at the planning stage of products, the environmental impact of it's inputs, the use and disposal of raw materials, the manufacturing process and ultimately the finished product.
3. by the continuous improvement of processes and procedures to achieve the progressive reduction or elimination of undesirable emissions and waste.
4. by following procedures to ensure the environmentally safe use and disposal of all products used onsite.

This includes the reduction at source of the waste generated, extraction of the maximum benefit from the waste materials, including the recycling of, and the minimisation of the environmental hazards associated with the disposal of waste.

Prevention of pollution is also achieved by promoting through training and communication a responsibility for the environment by employees, subcontractors and suppliers.

Dana Automotive Systems Group Australia - Yennora shall also set environmental objectives which will be reviewed annually, develop procedures to achieve these objectives and measure the effectiveness of our procedures to ensure continual improvement.

The environment is a precious resource and the company as a member of the community, is responsible to protect it in a manner that serves today's requirements whilst respecting the needs of future generations.

Ross Portolesi
Plant Manager
